AUTHOR's

Epistle to the READER.

READER,

Interest ready cast up, with all imaginable Care, to a Farthing, at 2½, 3, 3½, 4, 5, 6, 7, and 8 per Cent. And I had Thoughts of furnishing you with some more Tables for other Rates of Interest, but that I found it would have made the Book too big for your Pocket.

However, seeing they could not be comprised in so small a Compass as this Volume, and being willing that you should have A

A 2 Compleat

Compleat Interest Book; I have therefore, exhibited the most easy Methods for castingup Interest at any other Rate, by the following Tables.

In the first Place, I have given you a Table with some Rules to cast up Salaries and Wages by; and to these I have added another. Rule, whereby you may cast up Interest at any Rate for any Number of Days. But sinding that this Rule may in many Cases be objected to, as being too tedious and inconvenient for your Use, I have, for this Reason, presented you with some other Rules of a different Kind, which are to be done after a plainer and more familiar Manner, by my other Tables.

And these I have exemplified with such a Variety of Examples and Instructions, as I am assured (with little Application) will soon make you expert therein; so that you will have no Occasion for any other Interest Tables than what you will now find in this Book, carefully calculated, examined, and corrected,

By RICHARD HAYES.

TABLES,

WHEREBY

GOLD and SILVER in Bars

Are compared with

COURSE OF EXCHANGE.

READER,

Your Tables, of a different Kind from the preceding ones: They are New, and are generally thought to be useful in a very considerable Branch of Commerce; and therefore the Author, who is always ready to oblige the Public, has now annexed them to this new Edition of his Interest Tables, which are allowed by competent Judges, to be the Compleatest of the Kind hitherto published.

The

The following GOLD TABLE Explained.

Y OU are to understand, that the same Quantity of pure, fine, or Standard Gold, which, by the Laws of this Kingdom, denominates I Pound Sterling; the same Quantity of the same pure, fine, or Standard Gold, is denominated by Authority, at Amsterdam, 35 Schillings 6 Grotes 4 Bank Money.

By the above Ordinances, the Par of Exchange between London and Amsterdam for Gold is 35s. 6d. 2 Banco for 11. Sterling; and the Use of the Table is

this.

Suppose you lay out 100l. Sterling here in London, in Gold Bars, and these are sent to Amsterdam, to be there disposed of and the Returns to be made per Bill or Bills of Exchange; and surther suppose, that the same Quantity of Gold which denominates here 1l. Sterling, is there sold for 35 Sch. 6d. 4 Banco, and you make your Returns in Bills at 34s. 6d. and would you know what you get per Cent. by the said Gold; look in the Table for the Price of Exchange, viz. 34s. and 6d. even with the said Price towards the right Hand, you will find 102l. 19s. 2d. being the Returns at the said Price of Exchange, you will have for the 100l. you first laid out, which occasions a Gain of 2l. 19s. 2d. per Cent. in your Favour.

And as the Dutch in their Exchange upon London, do always give an uncertain Number of Schillings, Grotes and their Fractions, for the Pound Sterling certain; it is very obvious, the less Dutch Money is given in Exchange for the Pound Sterling, the more Sterling Money the Dutch Money will yield, and the contrary.

As for EXAMPLE.

Suppose the said Gold yielded in Amsterdam, clear of Charges, 11000 Gilders Banco, and the Returns were made in Bills at 35s. per Pound; the Table shews you, that the Exchange at 35s. does occasion a Profit in your Favour of 1l. 9s. 9d. per Cent. by Reafon, that you will receive by this Means 101l. 9s. 9d.

for the 100l. you fent from London.

And

But if the Exchange had been at 34s. which is a lower Price; then your Profit would have been greater. The Table at 34s. Exchange shewing that you would have occasioned a Profit of 4l. 9s. 5d. \(\frac{3}{4}\) per Cent. by reason you would have received 104l. 9s. 5d. \(\frac{1}{2}\) for your 100l. sent abroad, which is 2l. 19s. 8d. \(\frac{1}{2}\) per Cent. more Profit to you than if it had been done at 35s. The like is to be understood of the rest of the Table: But then it ought to be remembered, that there is Provision, Brokerage, Postage of Letters, and some other Charges will necessarily accrue in such Dealings; and therefore ought to be deducted before any just Estimate of the Profits can conveniently be made.

And it is further to be observed, that this Table and the Silver are both begun with the Price of Par, as does appear in both of them; so that if you return your Monies at Par, you will receive no more than 100 for 100.

The SILVER TABLE Explained; with the Use thereof.

A Sin Gold, so it is in Silver; the same Quantity of pure, sine, or Standard Silver, which by Authority in this Kingdom, does denominate 11. Sterling, by Authority in Amsterdam does denominate 36 Schillings 3 \frac{1}{4} Grotes Bank Money; and the Par of Exchange between London and Amsterdam, for our Silver Coin is 36s. 3d. \frac{1}{4} Grotes for 11. Sterling.

And the Use of this Table is the same as the Gold

Table.

As for EXAMPLE.

Suppose a Merchant were to lay out in Silver Bars 1001. Sterling, and he sent the same to Amsterdam, and there sold the same Quantity for 36s. 3d. 4 Bank Money, which cost him here 1l. Sterling, and the Returns are made him in Bills at 36s. per Pound, and he would know how much he gets per Cent. by the Returns.

He looks in the Silver Table for 36s. the Price of Exchange, and he finds annexed to the faid Price

1001. 15s. 1, so that, if he were to have Returns in Bills, it will occasion a Profit of 15s. 1 per Cent. or if he had the Opportunity of returning at 35s. the Table shews, that it would occasion a Profit of 31. 12s. 7d. 1, he having 103l. 12s. 7d. 1 returned him by that Means, for 100l. delivered. The like is to be understood, when the Returns are made at any other Price of Exchange; the Defign of these Tables being to shew how to negotiate either Gold or Silver to Advantage; they being calculated upon the following Principles; viz. One Ounce of pure, fine Gold is equal to one Ounce of pure, fine Gold; and one Ounce of Gold of any Fineness is equal to one Ounce of Gold of the same Fineness; and the fame is to be understood of Silver; this being called the intrinsick Value of Gold and Silver.

And when for our Pound Sterling, or for the pure, fine Gold contained therein, we can receive at Amferdam 35s. 6d. 4 Bank Money, which contains the fame Quantity of pure, fine Gold; then the extrinfick and intrinfick Value of these equal Quantities of Gold are equal.

But when the Exchange is more or less than 355.

6d. 4 Pank Money, for 11. Sterling, the Proportion between the intrinsick Value changes; and this Alteration produces the Exchange Value, and occasions Gain or Loss on the intrinsick Value of Gold to the Countries so exchanging. And when, for our Pound Sterling, or for the pure fine Silver contained Y therein.

therein, we can receive at Amsterdam 36s. 3d. 3d. Bank Money, which contains the same Quantity of pure fine Silver, then the extrinsick and intrinsick Value of those equal Quantities of Silver are equal.

But when the Exchange is more or less than 36s. 3d. 3d. Bank Money for 1l. Sterling, the Proportion between the intrinsick Value changes; and this Alteration produces the Exchange Value, and occasions Gain or Loss on the intrinsic Value of Silver to the Countries so exchanging. So that you may observe, by the preceding Examples, that the Design of these Tables is to shew at Sight, how much is gained or lost on the intrinsick Value of Gold and Silver in Bars, at the usual Courses of Exchange between London and Amsterdam; having begun one of the Tables with the Par of Gold in Bars, and the other with the Par of Silver in Bars.

Another Use these Tables may also serve for.

SUPPOSE a Bill at Sight is offered on Amsterdam, Rotterdam, Homburgh, or Antwerp, at 35s. 11d. and another Bill at the same Time, for the same Place. for two Months, is offered at 35s. 9d. and you would know how much per Cent. the Difference does amount to: in Answer to such Questions, the Silver Table will shew near enough to Satisfaction; as thus: s. a. l. s. d.

At 35 9 it amounts to 1 9 1½ per Cent.

At 35 11 to 19 11¼ per Cent.

Subtract; the Difference is 9 21/4 per Cent. which is the Answer to the Question:

Or suppose Money is remitted to any of the said Places at 35s. 11d. and an Opportunity offers for drawing back again at 34s. 9d. and 'tis desired to know how much per Cent. this Negotiation will amount to:

The SILVER TABLE shews,

s. d. l s. d. The Difference.

At 34 9 is about 4 7 6 per Cent. l. s. d.

At 35 11 is about 19 11 per Cent. 3 7 6 4

And about 31. 7s. 6d. 3/4 per Cent. is the Answer; being the Sum gained by negotiating Bills at these Rates: and by using the Tables after this Manner, the Answer will be near enough to let one know whereabouts the Difference is per Cent. upon such Occasions.

TAKE NOTICE,

THAT the London Weight is commonly reckoned to be about 11. per Cent. better than Amferdam Weight; and that the Charges in carrying Gold from hence to Amferdam, with Insurance and Freight, &c. does amount to above 2½ per Cent. and that a Guinea usually passes current for 11 Gilders, 5 or 6 Stivers.

And the Price of fine Gold and fine Silver is fixed and unalterable in *Holland*: So that whatever Difference there may be in the Amount proceeds from the Largeness or Smallness of the Premiums, which are often varying to the Demands of either Sort.

See more in my Negotiator's Magazine, of Money and Exchange, &c. And also in my new Standard Tables.

EXAMPLE. II.

What is the Interest of gol. 10s. for 87 Days, at 5 per Cent. per Annum.

First under 4 per Cent. and against 9 Days is 0009863. omit the left Hand o, and it makes 009863 for 90 Days; then against 6 Days and under 4 per Cent. is 0006 575 omit the five at the right Hand as useless and make the 7 an 8, so is 000658 for 6 Days; add these Numbers together as in the first Example, and the Interest for 11. for 96 Days will be 010521; this multiplied by f. 170,9 (for the half of 18s. is 9, the Decimal for 18s.) the Product is 17980389, cut off with a Comma 7 Figures from the right Hand, because there is 7 Decimals in the Multiplicand and Multiplier, and it becomes 1,7980389. Now to value this, the 1 on the left of the Comma is 1/. the 7 doubled is 14, and 5 must be taken out of the 9, which is 15. more, and makes 155. the 4 that was left is 40 Farthings, and the 8 the fourth Figure makes 48 abate 2 and it is 46 Farthings, or 11d. 1; so that the Answer is 11. 155. 11d. 1.

N. B. The Reason for abating 2, is because we

reckon 1000 Farthings to the Pound.
